

Appl. No. 10/812,527
Amdt Dated Oct. 11, 2005
Reply to Office Action July. 11, 2005

REMARKS

Applicant highly appreciates the allowance of claims 11-13.

Claim Objections

Regarding to claim 8, Applicant has amended claim 8 according to Examiner's suggestion, and therefore, the objection thereof is overcome. Additionally, Applicant amends claims 4-7, 8 and 11 whereby minor informalities of claim language are overcome.

Claim Rejections Under 35 U.S.C. 112

Regarding to claim 9; Applicant amends claim 9 to depend from claim 7 and adds some necessary limitations thereto. Thus, the rejection is overcome.

Claim Rejections Under 35 U.S.C. 102

Claims 1-6, 10, 14, 15-17 are rejected under 35 U.S.C. 102 (e) as being anticipate by Liu (US 6,731,504). Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

In response, Applicant amends claims 1, 14, 15 and 16.

Applicant appreciates that Examiner point out one allowable subject matter of the application which is a spring finger on the connecting part of the buckling piece. With respect to claim 1, Applicant adds the allowable subject matter to claim 1. Therefore, claims 1 is allowable.

Claims 2-10 depend from claim 1, and should be allowable. Claim 14 is amended to depend from claim 11, therefore, claim 14 should be allowable due to claim 11 being allowable.

Appl. No. 10/812,527

Claim 15 defines the pivotal axis of the cam member extending along a second direction being perpendicular to the first (extension) direction of the elongated pressing part so as to allow the cam member to be rotated in a plane aligned with the pressing part along the first direction. Understandably, this kind of arrangement takes less space than the structures disclosed in Liu in which the pivotal axis of the cam member is aligned with the extension direction of the elongate pressing part, and the cam member is rotated in a plane perpendicular to the extension direction.

Accordingly, the invention defined in the amended claim 15 is not anticipated or render obvious by Liu. Reconsideration and allowance of claim 15 are respectfully requested. Claims 16 and 17 are also allowable at least by reason of their dependencies upon claim 15.

In view of the foregoing, the subject application as claimed in the pending claims is in a condition for allowance and an action to such effect is earnestly solicited.

Respectfully submitted,

Lai et al.
